

UTILITY ELECTRONIC METER READING

ENHANCES

Utility Management

Handwritten data for meter readings is a thing of the past. The Clarity Electronic Meter Reading module is designed for the billing clerks and meter readers who need to keep track of metered services in an efficient, reliable way.

This module simplifies the meter reading process by interfacing directly with the meter reading software and collecting the data electronically, data that was previously painstakingly recorded by hand. You can export and import customizable reading files to a vast number of software providers in addition to using the information captured by your reading software to update your meter information.

CAPABLE

- Quickly set up export and import files according to major meter reading software standards.
- Handle high/low usage and reading checks.
- Use the import process to easily override incorrect information.

EFFICIENT

- Create export files with customizable meter, customer, and route options.
- Update meter and billing information according to data in the file provided from reading software.
- Customize file formats with a variety of information used by various reading software providers.

FLEXIBLE

- Create files in fixed-length or XML formats.
- Interface with multiple meter reading software at the same time.
- Create user-defined fields.

POWERFUL

- Custom reporting
- Powerful search options
- Interactive task list
- Electronic document and image attachments
- Application, task, and field level security
- Print, save, and export all reports
- History and management tracking
